

The Stellana Smoothy is simply better. Here's why:

- Last longer
- Operators travel faster with less shaking, decreasing chance of fatigue
- Improved handling and increased stability dramatically reduces reach wobble and sway
- Smoother operation means decreased risk of cargo damage
- Improved efficiency extends battery and motor life, saving time and money
- Cool Smoothy's special low-temperature cold storage compound provides exceptional performance in refrigerator and freezer use

BUILT FOR SPEED

AC™ is Stellana US's new cutting edge 85A premium press-on tire compound. Performance and durability improvements are breaking all of the records. Development began because industry standard tire compounds could not stand up to the increasing requirements of the AC conversion.

AC PROVIDES:

- Excellent Traction
- Reduced Tire Spin
- Reduced Tire Heat Build-up
- Reduced Tire Flat Spotting
- Improved ride handling
- Reduced driver fatigue
- Reduced vibration
- Reduced maintenance cost
- Increased Productivity
